

BRONZEVILLE MICROGRID SHOWCASE AND JOB FAIR

September 15, 2018

ComEd invites you to this special event to learn how the **Community of the Future** can benefit you!

The Bronzeville Microgrid project is underway.

Because a microgrid can operate when connected to the larger grid or when not connected to keep local power flowing in times of emergency, it helps deliver reliability, resiliency and security to your area.

Savings for residents.

You can take advantage of everything the ComEd® Energy Efficiency Program has to offer – to help you save money and save energy, too.

New opportunities for small businesses.

All businesses are eligible for a FREE energy assessment. You'll identify ways to improve energy efficiency at your business to help your bottom line. Does your business specialize in a trade? Learn how you can become a ComEd Energy Efficiency Trade Ally.

Career guidance at the job fair.

Get help with your resume and interviewing skills. Discover job opportunities in the energy field and other industries.

© Commonwealth Edison Company, 2018

The ComEd Energy Efficiency Program is funded in compliance with state law.

Pictured here is an exhibit illustrating the microgrid on the Illinois Tech Campus. ComEd will connect its project to the Illinois Tech microgrid, creating the first utility-operated microgrid cluster in the nation.
